System Integration

Project description

Patrick Stolc
M.Sc. Robotics Engineering

The project

💾 Scope

- Realtime enterprise communication platform: Bizcord

💾 A Discord-like application

- Focus is only on the backend

💾 Business requirements

- Realtime communication

- Channel management

- User profiles

- Engagement (notifications, reactions, etc.)

- ...

How will this work?

💾 Monorepo

- You'll be contributing to a monorepo

- You'll work on your own microservice

💾 Pretend it's a "real" project

- Use git correctly

- Give and receive feedback

- Raise issues

Before next lecture

💾 **Accept GitHub invitation**

- Will be sent to your school email

- Will be sent out tomorrow

💾 **Form teams**

- On GitHub

- No more than 4 people per team
